1990 - 91 Professional Salary Schedules in Maryland Public School Systems

Maryland State Department of Education
Statistics and Reports Section
200 West Baltimore Street
Baltimore, MD 21201

DMIS04110 (R) 250 10/90

INTRODUCTION

Salaries comprise 66% of the cost of education in Maryland. The largest share of the salaries goes to teachers and others who work with students on a daily basis. Therefore, it is essential to the success of education in Maryland that salaries are competitive with other professional positions so competent, qualified, and dedicated instructional staff are recruited initially and encouraged to remain in the profession.

In Maryland, educational funding is the joint responsibility of the 24 local governments and the state. Teacher and other school system employee salary schedules are determined within the individual system through negotiations with the school board and the county government. The State of Maryland has little input into school system salary schedules but has influence indirectly through state aid initiatives earmarked for salary improvements.

During the 1980's, public support for salary increases has allowed local school systems to improve teachers' pay and restore previously lost purchasing power. During this decade when the Consumer Price Index increased 57%, Maryland teachers fared much better. On the average, salaries increased over 115%. At the entry level, the increase was about 105%.

Improving teacher's salaries was a national trend with teacher salaries increasing by 96% from 1979 to 1989. Maryland teachers did slightly better than the average teacher nationally. From 1980 to 1989, Maryland's rank in average salary rose from 10th to 6th[1].

As a condition of employment, Maryland teachers and administrators must obtain valid certification from the State Superintendent of Schools. In addition to meeting minimum educational requirements, teaching applicants must pass several tests in the National Teacher Examination (NTE) series to qualify for a Standard Professional Certificate. An Advanced Professional Certificate is available after 3 years of successful teaching experience for teachers who have met minimum education requirements.

The following tables were approved for public release by the local boards of education. For information about employment possibilities in Maryland school systems, please contact the personnel office(s) of the school systems(s) in which you are interested.

Table 5

Basis of 1990-91 Salaries for Twelve-Month Principals in Maryland Public School Systems

Local Unit	Salary		Salary Determinants
	Minimum	Maximum	
Allegany	41,072	56,537	Salary schedule based on size of school plus differentials for advanced preparation and longevity
Anne Arundel	42,793	71,555	Salary schedule based on size of school
Baltimore City	47,480	71,970	Salary schedule based on responsibility
Baltimore-7/1/90	39,249	64,929	Twelve-month teacher salary plus responsibility factors
-12/31/90	40,818	67,525	Twelve-month teacher salary plus responsibility factors
Calvert	41,378	74,138	Base salary determined by degree type and years of experience, multiplied by 1.40 - 1.55, depending upon school size/type
Caroline	44,013	60,893	Base salary multiplied by responsibility factor determined by school level/type, plus differentials for years of experience, level of education and longevity
Carroll	39,575	71,236	Salary schedule plus differentials for school type, preparation and longevity
Cecil	41,526	63,071	Salary schedule based on school level plus differentials for advanced preparation and longevity
Charles	48,492	60,852	Salary schedule with adjustments based on position analyses, longevity, performance, and school system needs
Dorchester	46,270	53,875	Base salary multiplied by factor determined by school type, plus differentials for years of experience and level of education
Frederick	39,322	66,877	Salary schedule based on school level plus differential for earned Doctorate
Garrett	*33,060	61,249	Salary schedule based on length of contract and school size plus differentials for advanced preparation and longevity
Harford	37,710	64,027	Teachers salary multiplied by 1.2 plus differentials based on school size/level
Howard	51,082	71,788	Salary schedule based on school level/type
Kent	44,808	62,377	Salary schedule based on school size plus differentials for advanced preparation
Montgomery	59,255	82,287	Salary schedule based on school type/level
Prince George's	54,600	74,550	Salary schedule based on school level plus longevity
Queen Anne's	50,375	65,141	Base salary multiplied by management increment ranging from 1.25-1.47 plus differentials for degree and longevity
St. Mary's	38,492	66,518	Salary schedule based on school level plus differentials for advanced preparation and longevity
Somerset	34,795	49,165	Teacher salary fimes factor of 1.1-1.2 plus differentials for size of school
Talbot	45,077	57,267	Salary schedule based on school assignment plus differentials for additional preparation; performance based increases in salary available after hire or promotion to position
Washington	44,363	58,145	Salary schedule based on school assignment plus differentials for advanced preparation
Wicomico	48,300	60,050	Salary schedule based on school size
Worcester	39,034	64,730	Teacher salary schedule equated to months worked multiplied by 1.13-1.25, depending upon school size/level, plus longevity

*Eleven-month

Table 6

Basis of 1990-91 Salaries for Vice Principals in Maryland Public School Systems

	Salary		
Local Unit	Minimum	Maximum	Salary Determinants
Allegany	31,949	45,500	Salary schedule based on size of school plus differentials for additional preparation and longevity
Anne Arundel	39,636	62,435	Salary schedule based on size of school
Baltimore City	43,914	55,889	Salary schedule based on negotiated agreement
Baltimore-7/1/90	35,743	60,881	Twelve-month teacher salary plus responsibility factors
-12/31/90	37,173	63,315	Twelve-month teacher salary plus responsibility factors
Calvert	36,206	64,572	Base salary determined by degree type and years of experience, multiplied by 1.225 - 1.35, depending upon school type/size
Caroline	40,797	53,875	Base salary multiplied by responsibility factor, plus differentials for years of experience, level of education and longevity
Carroll	39,413	63,054	Salary schedule plus differentials for school type, preparation and longevity
Cecil	*37,302	54,626	Salary schedule based on school level plus differentials for advanced preparation and longevity
Charles	40,684	47,446	Salary schedule with adjustments based on position analyses and salary range recommendations, longevity, performance, and need
Dorchester	#40,900	49,813	Base salary multiplied by 1.14, depending upon school type, plus differentials for years of experience and level of education
Frederick	36,099	58,803	Salary schedule based on school level plus differential for earned Doctorate
Garrett	33,060	47,168	Salary schedule based on years of A&S experience plus differentials for advanced preparation and experience
Harford	32,882	59,372	Teachers salary multiplied by 1.2 plus differentials for school level/teaching responsibility
Howard	39,801	66,096	Salary schedule based on school level/type
Kent	39,918	52,736	Salary schedule based on school size/level plus differentials for advanced preparation
Montgomery	51,617	66,975	Salary schedule based on school type/level
Prince George's	46,200	63,500	Salary schedule based on school level plus longevity
Queen Anne's	42,315	55,066	Base salary multiplied by management increment ranging from 1.05-1.22 plus differentials for degree and longevity
St. Mary's	#33,203	54,973	Salary schedule plus differentials for advanced preparation and longevity
Somerset	@34,795	@41,600	Teacher salary schedule multiplied by factor of 1.05 plus differentials for size of school
Talbot	43,764	52,016	Salary schedule plus differentials for additional preparation; performance based increases in salary available after hire or promotion to position
Washington	37,397	50,767	Salary schedule based on school level plus differentials for advanced preparation
Wicomico	40,550	50,450	Salary schedules based on school size plus differentials for degree and responsibility factors
Worcester	31,885	57,202	Teacher salary schedule equated to months worked multiplied by 1.06-1.10, depending upon school size/level, plus longevity

APPENDIX

A Enrollment in Maryland Public Schools: September 30, 1990 (Equated* Enrollment (Col. 4) Used in Calculating Staffing Ratios in Table 1 and 1a)

INTRODUCTION

The following Tables were prepared from the Staff Reporting System, a computer database developed by the Maryland State Department of Education's (MSDE) Office of Management Information Systems (OMIS). Local Education Agencies in Maryland report these data to OMIS on magnetic tape in November of the current school year for staff members who are active as of October 15. Staff are further reported in the category in which they are budgeted in accordance with the Financial Reporting Manual for Maryland Public Schools. Hourly and contractual employees are excluded from the report.

The tables include the full-time equivalent (FTE) number of staff who are employed in the instructional and noninstructional functions at the local level. As in the past, the ratio of the number of instructional staff per 1,000 students in Grades Prek-12 including school level administrators has been included in this publication.

The compilation of these data were made possible by the excellent cooperation of local education agencies who strived for completeness and accuracy in submitting the reports.

INTRODUCTION

This report presents the distribution of the student population in Maryland Public Schools by race/ethnic categories. Section I shows the distribution by school district and geographic regions of the state, while Section II shows the total minority students (Blacks, Asians, Hispanics and American Indians) as a percent of enrollment in each school.

Since 1980, the percentage of minority students enrolled in Maryland public schools has increased by more than five percent from 33.3 percent in 1980 to 38.9 percent in 1990. This increase has been mainly in school systems within the National Capital region of the state and can be attributed to the increase in the number of Asian and Hispanic students. Enrollment in each group nearly doubled in size during this period. The number of Asian students rose from 13,578 (1.8%)in 1980 to 24,378 (3.5%) in 1990. Likewise, the number of Hispanic students rose from 6,859 (0.9%) to 16,507 (2.3%) during the same period.

Black students, representing the largest minority group, make up almost one-third of the student population (32.9%). In 1980, Black students represented 30.4 percent of the population. Between 1982 and 1986, Black enrollment declined by about 11,000 students just as overall public school enrollment declined. Since 1986 however, Black enrollment has begun an upward trend and now exceeds the number enrolled in 1980.

Methodology

The data for this report were submitted by local education agencies in Maryland in response to a survey developed by the Office of Management Information Systems. Included in the report are students who are enrolled in regular and special programs in prekindergarten[1] through grade twelve, excluding evening high school. The race/ethnic categories correspond to those designated by the Office for Civil Rights and the Equal Employment Opportunity Commission on their school and staff surveys. For the purposes of this report, the term "minority" includes students reported as American Indian/Alaskan Native, Black, Hispanic and Asian.

Results

Table 1 in Section I presents the fall 1990 enrollment in each race/ethnic category by local education agency grouped by geographic regions of the state. Inspection of Table 1 indicates the National Capital region, comprised of Prince George's and Montgomery counties, enrolls the largest percentage of minority students (56.0%) and is the most ethnicly diverse region in the state. This is chiefly due to the large minority population in Prince George's county (73.4%) and the growth in the Asian and Hispanic populations in Montgomery county. Figure 1 presents the race/ethnic distribution of students as a percent of the total enrollment in 1990. Figure 2 presents the percent of minorities in each region of the state.

---

[1] Prekindergarten enrollment is excluded in the following counties: Carroll, Charles and Prince George's.

Table 2 presents the enrollment trends at the state level for even years from 1980 through 1990 Figure 3 highlights the growth in Asian and Hispanic enrollment during this same period.

Section II presents the total enrollment, grade span and the number and percent of minority students enrolled in each school in Maryland. Of the 1,217 schools in the state, 15 (1.2%) have no minority representation. Most of these schools are in Garrett County where minorities make up 0.2 percent of the enrollment. Conversely, 28 schools (2.3%) have 100% minority enrollment. The majority of these schools are in Baltimore city where minorities make up over 80% of the enrollment.

Enrollment in vocational schools which provide programs to students from various high schools in the county are not included in this report. Those students are counted at their home based school.

Introduction

Figure 1........... Average Classroom Teachers' Salaries by Local Education Agency

Figure 2........... Percent Change in Average Salaries for Teachers and Others: 1986-1990

Table 1 .... State Totals: Average, Median, Quartile Salaries

Tables 2 through 25 Average, Median, Quartile Salaries by Local Education Agency

Appendix A......... Average Salaries of Selected Positions and Percent Change: 1986-1990

Appendix B......... Classroom Teachers' Salaries Indexed to Region

The following report presents an analysis of salaries earned by professional staff employed in Maryland public schools. The report includes selected central office staff, school level administrators, teachers, and other professionals. The salaries are derived from local payroll records of individuals and include their annual base pay, determined by education and experience, plus stipends for longevity, extra duties, and extended contracts. Salaries of individuals employed part-time are equated to full-time.

Table 1 presents the statewide calculation of the average and median salary, as well as the salaries at the first and third quartiles for each position classification. Tables 2 through 25 give similar information for each local education agency (LEA) in the state. Appendix A presents the average instructional salary and the percent change between October, 1986 and October, 1990. Appendix B shows the average, median, and quartiles for classroom teachers grouped by regions with LEA salaries indexed to the region.

Calculations:

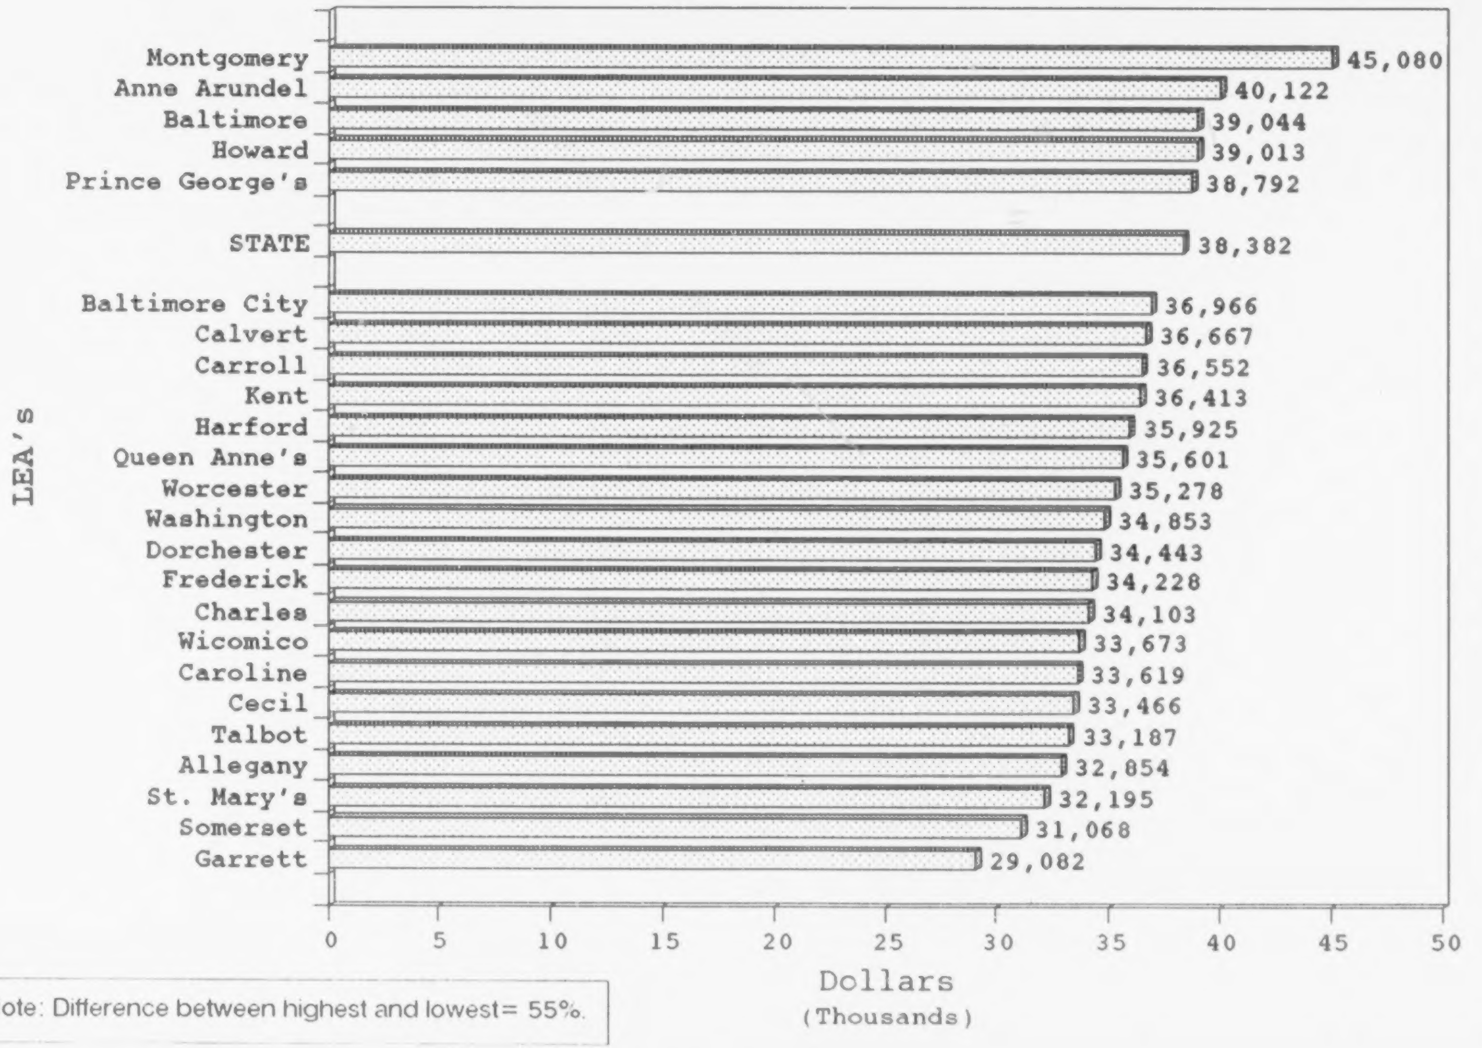
Average (mean) salaries, computed by summarizing individual salaries and dividing the total by the number of equivalent positions in the group, is the figure most frequently used for comparison. However, it's value is influenced by extremely high or low salaries in the distribution and may not provide a true estimate of the population average. Therefore, the median is also provided as a more stable calculation of "average salary". The median represents the salary which divides the group in half where fifty percent earn more and fifty percent earn less. The first and third quartiles provide an estimation of the distribution of salaries across the group. For example, the bottom twenty-five percent is determined by the salary at the first quartile and the top twenty-five percent is determined by the salary at the third quartile. Inspection of Table 1 indicates that the twenty-five percent of the classroom teachers in the state are paid $31,831 or less, while twenty-five percent earn a salary of $43,976 or higher.

Position Classifications:

The position types used in this report are based on definitions prescribed in the Specifications and Procedures Manual for the Staff Reporting System. Directors, coordinators, and supervisors include persons in charge of instructional and administrative functions, maintenance and operation of schools, food service, health and transportation.
Persons whose time is split between functions are counted once in their primary function.

Figure 1

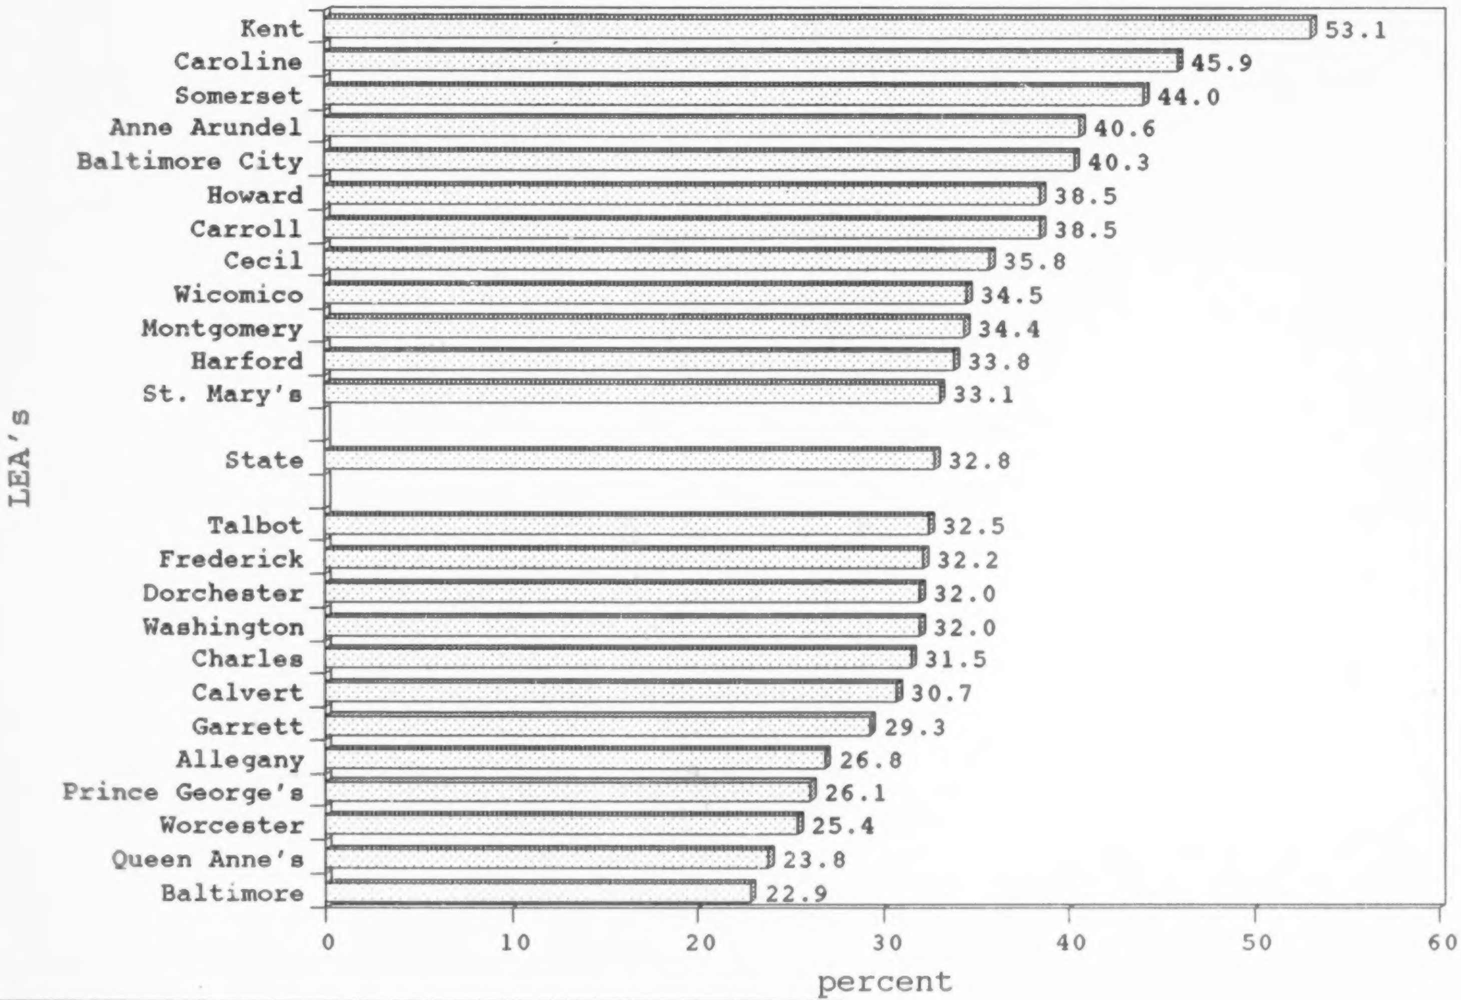
Average Classroom Teachers' Salaries Maryland Public Schools: October, 1990



Note: Difference between highest and lowest= 55%.

Figure 2

Percent Change in Average Salaries for Teachers and Others* : 1986-1990



*Others include: Therapists, Librarians, Counselors, and Pyschologists.

Introduction

Selected Financial Data is prepared annually by the Maryland State Department of Education to provide financial information about the local education agencies (LEA's) in Maryland. Part 2 of this series contains information about expenditures in a format designed to provide enough information to achieve historical continuity, conformity to State budget requirements, and conformity to federal expenditure definitions.

Information on the tables which follow were provided by each LEA on the Annual Financial Report forms (AFR 04100 series). Expenditure reports are submitted for all locally-available unrestricted expenditures, and for each federal restricted program, each state program requiring a restricted report, and for locally-restricted programs. From these reports, a summary report is prepared to consolidate the details. This summary report is reconciled by category to the LEA's independent auditor report, thereby assuring the integrity of the component reports.

This year, Table 1 reveals expenditures reported by the LEA's for the Student Activities Fund. These funds are generally maintained on a cash basis and are owned and operated by the student body under the direction of the LEA. These expenditures have not been included in any of the total columns and are presented for information only to give a more complete picture of the total cost of education.

---

*Excludes Transfers within Maryland, repayment of principal, and Student Activities Fund expenditures.

+Excludes monies paid by one Maryland school system to another Maryland school system (Transfers within Maryland)

#Excluded from Totals as expenditures have been reported by receiving local unit.

NOTE: Expenditures for equipment are included in the category for which the expenditure was made on this table only.

INTRODUCTION

Maryland has 24 locally-dependent public school systems, each of which is geographically identical to one of the 24 political subdivisions in Maryland. These school systems have no taxing authority and must compete with other county/city agencies for funds (appropriations) necessary to provide essential services. Although the majority of the funding in Maryland is derived from local revenue, State law dictates minimum funding levels which must be maintained by the local government for the receipt of State Aid.

In the past ten years, there has been tremendous growth in the funding of public education in Maryland. According to the National Education Association[1], Maryland ranks 8th nationally in per pupil spending for the 1988-89 school year, up from 11th place in the 1979-80 school year. Per pupil expenditures increased from $2,601 in 1980 to $5,461 in 1990, or more than 140%.

The information in **Selected Financial Data** is derived from the information provided annually by the schools systems in each of the 24 **Annual Financial Reports (AFR)**. All reporting formats, reporting requirements, account code, and definitions are contained in the accompanying **Financial Reporting Manual for Maryland Public Schools, 1983**. The design of the coding structure allows the **AFR** to meet most state and federal financial reporting requirements.

Missing from this release is Table 13 showing the percent of local revenue going to local school systems. As noted on the Table of Contents, this information will be available mid June and will be sent only upon request.

Professional Staff By Assignment, Race/Ethnicity and Gender

Maryland Public Schools: October, 1990

Maryland State Department of Education
Office of Management Information Systems
Research, Evaluation and Statistical Services Branch
200 W. Baltimore St.
Baltimore, Md. 21201

OMIS 04110 (R)104-05/91

INTRODUCTION

This report describes professional staff employed in local education agencies (LEA's) in Maryland by assignment, race/ethnicity, and gender. The tables show the number and percent of males and females in the central office, elementary, secondary, and middle/combined schools. In addition, the staff are classified according to the race/ethnic categories designated for reporting purposes by the Equal Employment Opportunity Commission.

Information contained in this report was compiled from data reported to the Office of Management Information Systems (OMIS) by LEA's in the state. The tabulations include all persons employed as of October 15 for whom a position was budgeted, but exclude hourly, substitute, and special contractual employees.

The assignment classifications correspond with positions described in the Staff Reporting System Guidelines for Local School Systems in Maryland. In general, central office assignments, i.e., directors, coordinators, supervisors and specialists, perform duties related to both instructional and noninstructional functions. For example, supervisors may include persons who work in curricular areas or in student transportation, budgeting, or facilities management.

Highlights

Total Staff

Maryland LEA's employed over 50,000 professional staff members as of October, 1990. Almost three-fourths (73.6%) were women and 26.4 percent were men. Whites make up 78.5 percent of the staff, Blacks make up 20.1 percent and other racial groups make up the remaining 1.3 percent. Since 1986, the percent of females has risen from 70.6 percent to 73.6 percent see (Figure 1). During the same period, the percentage of minority staff (Blacks and Others), has declined slightly from 22.7 percent in 1986 to 21.5 percent in 1990 (see Figure 2).

Central Office Staff

Tables 2 through 2C show the distribution of central office professional staff including superintendents and assistants, directors, coordinators, supervisors, specialists, and pupil personnel workers. Of the more than 50,000 professionals employed in LEA's, 2,080 (4.2%) are employed in the central office. The majority are white males representing 42.7 percent. White females, who make up 32.5 percent of the staff in central office, are the next largest group followed by minority females (17.1%) and minority males (7.7%). Since 1986, the number and percent of females holding central office assignments has increased from 42.3 percent in 1986 to 49.5 percent in 1990. Figure 3 illustrates the change in the number of males and females in central offices between 1986 and 1990.

School Level Staff

Tables 3 through 9c show the distribution of school level staff including principals and assistants, teachers, therapists, guidance counselors, librarians, and school psychologists. Inspection of Table 3, Total Principals, indicates white principals outnumber Blacks and Others by three to one. Females, however, fare better in school level administration where they represent 44.3 percent of the principals than in the central office where they represent 32.5 percent of the staff. In elementary schools (Table 3A) the percent of females (53.8%) exceeds the percent of males (46.2%). This is not the case at all school levels. For example, at secondary schools (Table 3B), the percent of male principals (77.9%) far exceeds the percent of females (22.1%). Likewise at middle/combined schools (Table 3C) the number of male principals exceeds the number of female principals. The remaining tables (4 through 9C) show similar comparisons with other school level staff.
